Master's Project Process
Procedure to request advisor add code for 297A

In order to work with me as an advisor for Master's Project there is set of steps you should follow before I can give you an Add Code for EE297A.

1. **Come up with an idea for a project**
    1. The idea should be related to something you are interested in
    2. You should have strong background on the topic related to your idea (i.e., you should not use EE297 to learn the subject, you should already know it)
2. **Prepare an 1-page proposal**
    1. The proposal should address 4 things
        1. What is the project?
        2. How are you going to implement it? What tools will you use?
        3. What does the final product look like?
        4. What will you measure to show that it is working?
    2. The proposal should be well researched. Show that you know what is the state-of-the-art in the topic you have chosen
    3. I am not evaluating the idea itself, I am evaluating how well you prepared your proposal
3. **Set up an appointment to present your proposal**
    1. Once your proposal is ready, send me an email to set up an appointment so that you can present your proposal
4. **Receive an email with the decision**
    1. I will make a decision about the groups I will be working with once I have listened to all proposals.
